FASHIONING RESURGENCE: *Our Time is Now*

Theme Details

The theme of 23rd Annual International Foundation of Fashion Technology Institutes (IFFTI) is “**Fashioning Resurgence: Our Time is Now**”. This is a congregation of speculative, iterative, and transformative ideas and action in the field of Design, Education and Fashion Industry. Our attire has a deeper meaning than what meets the eye. In the past few decades, it has been clearly established that the relation of humankind with fashion and clothing industry has been far from being tenable. Given the current global situation, we are faced by three kinds of temporalities: ***The Emergent; The Urgent; and The Incumbent***. Each of them has an immediacy associated with them. They all call our attention and demand action.

This is a platform where academicians, policymakers, students, industry representatives and other leaders converge for insightful conversations and discussions and make actionable plans for the future of the global fashion industry and affiliated fields.
